**PFSCM** has implemented a next-generation supply chain management **Control Tower** for the end-to-end tracking of products and information through the whole supply chain.

Our Control Tower provides:

- **End-to-end tracking** of products and shipments from point of origin to destination.
- **Tailored, accurate, real-time data** for evidence-based decision making.
- **Secure, uninterrupted cloud sharing** of authorized information among stakeholders on one digital platform.
- **Easy electronic record keeping** through secure, tamper-proof platforms and technologies for improved chain of custody and audit trails.
- **Access to a platform** that serves as the foundation for serialization, authentication, and blockchain and is used to identify counterfeit goods and ensure product integrity.

By bringing innovative technologies to the public health supply chain, we:

- **Connect public health supply chain stakeholders** to real-time information for better decision making, accountability, and visibility across the board.
- **Collect and analyze** in-country data for better procurement planning to reduce stockouts and wastage.
- **Collaborate with stakeholders** on one platform to streamline communications, reduce email traffic, and ensure no tasks and actions are overlooked.
- **Provide real-time notifications** and alerts about any possible delays in the supply, ensuring immediate actions for proactive risk management.

PFSCM’s Control Tower is powered by One Network.
PFSCM strengthens, develops, and manages secure, reliable, cost-effective, and sustainable global supply chains to improve the lives of people in low- and middle-income countries.

Our Partnerships

PFSCM partners with donors, governments, NGOs, and pharmaceutical companies to develop and manage supply chains. Our partners and clients include the Global Fund to Fight AIDS, Tuberculosis and Malaria; the US Agency for International Development; Save the Children Myanmar; the governments of the Dominican Republic and Malawi; Gilead; Janssen; and the Elizabeth Glaser Pediatric AIDS Foundation. PFSCM is also a member of the Partnership for Quality Medical Donations (PQMD).

Our Impact

IN 2017
84% of deliveries of products to fight HIV and malaria were made on time and in full (OTIF)

MORE THAN
$5.55 billion in lifesaving commodities delivered to 101 countries since 2005

ONLY
0.02% commodity losses thanks to our rigorous security and quality assurance measures

MORE THAN
$175 million saved for clients through shipment planning to maximize ocean and road freight and minimize air freight

About Us

Founded in 2005, PFSCM is a nonprofit organization that strengthens public health supply chains, ensuring lifesaving commodities are accessible and available to communities in hard-to-reach places. JSI Research & Training Institute, Inc. is the parent company of PFSCM.
